

TITANUS® ServiceXpress

Commissioning and service software for TITANUS REX® aspirating smoke detectors. For one of the highest levels of security and convenience in use.

Description

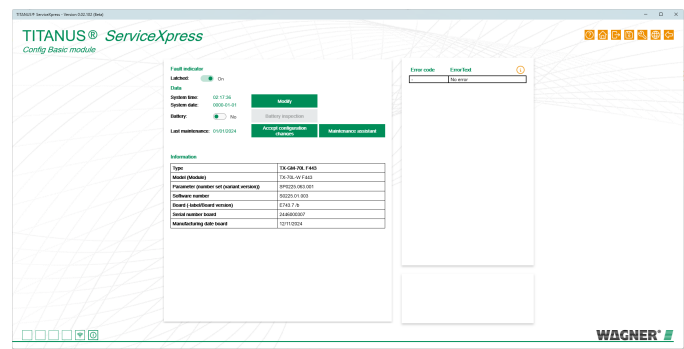

The intuitive, assistant-guided software tool TITANUS® ServiceXpress is designed for the commissioning, maintenance, and servicing of TITANUS REX® aspirating smoke detectors.

Predefined parameter sets are made available through interplay with TITANUS PipeXpress® PLUS. This helps make sure that the actual parameter settings for TITANUS REX® match the calculations and the project-specific certificate of conformity.

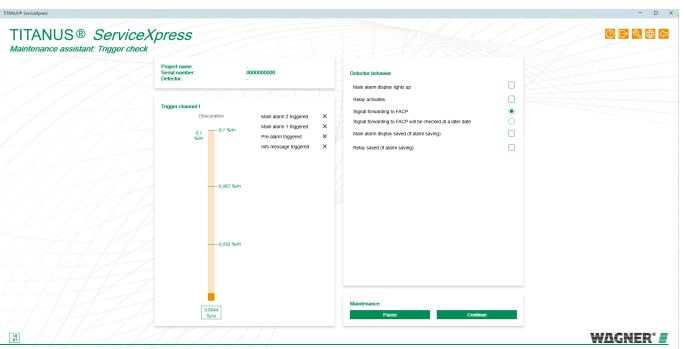

Features

- Commissioning assistant
- Maintenance assistant
- Use of parameter sets created in TITANUS PipeXpress® PLUS
- Secure connection via WPA3
- Verification of the detector configuration, including a self-test
- Event log
- Visualization of device information
- Certification of standards-compliant commissioning
- Report and log generation
