

Outlook from Andreas Erbe: "Our global customers rely on integrated fire protection from WAGNER"

- **WAGNER Fire Safety Consulting GmbH under new management**
- **Logistics and fire protection specialist Andreas Erbe retires and hands over the position of Managing Director to Cecil von Dungern**
- **Focus on further internationalization**

Langenhagen. Andreas Erbe worked for many years in various positions and companies within the logistics industry before joining the management of WAGNER Fire Safety Consulting and thus moving from fire protection customer to fire protection provider. The manager is now taking his well-deserved retirement and is handing over the position to Cecil von Dungern.

"The time has come for me to hand over my responsibilities at WAGNER after seven years. With Cecil von Dungern, we have been able to gain a colleague who is also anchored in the logistics world and will continue on the path of internationalization."

WAGNER is a solution provider for individual, holistic fire protection solutions. The OxyReduct® oxygen reduction system prevents the development or spread of fire in protected areas under defined conditions. The TITANUS® series of air sampling smoke detectors developed by WAGNER are available for the earliest possible fire detection. Firefighting with gas extinguishing systems and hazard management systems round off the fire protection portfolio.

"I am personally convinced of our holistic fire protection solutions, and our customers also rely on WAGNER for fire protection - and not just in the logistics market. The partnership-based cooperation has always given me great pleasure and I am sure that the company will continue on this path successfully."

Steffen Springer, Managing Director of WAGNER Group GmbH, confirms this and thanks Andreas Erbe: "With Mr. von Dungern, WAGNER Fire Safety Consulting will of course continue the strategic cooperation with our global customers and business partners and will also continue to drive the internationalization with the expansion of Global Account Management. I would like to thank Andreas Erbe very much for his commitment to our company. Through his commitment, he has brought significant progress for WAGNER Fire Safety Consulting by strengthening the cooperation with our partners and making a significant contribution to the positive development of our business. It is great that he will remain on friendly terms with the WAGNER Group. We wish him all the best for the future."

About WAGNER

The WAGNER Group GmbH, headquartered in Langenhagen, Germany, has been developing and implementing integrated fire protection solutions since 1976 and has established itself as an innovative solutions and systems provider with around 750 employees at 23 locations in 14 countries worldwide. With more than 700 patents, the Group is a technology leader in fire detection and prevention. Its main area of expertise lies in the field of technical fire protection. Here, WAGNER develops individual solutions using its own products, systems and services in the fields of fire detection (TITANUS®), fire prevention (OxyReduct®), fire extinguishing (FirExting®) and organization/hazard management (VisuLAN®).
